Yassine KHLIF

Computer Engineer | AI Full-Stack Engineer

+216 92951113 | yassinkhlif08@gmail.com | LinkedIn: yassine-khlif | GitHub: yassinekh08 | Sfax, Tunisia

Professional Profile

Computer Engineer, top of my graduating class, driven by a passion for turning **AI** into intelligent, **full-stack software** people actually use.

Education

International Institute of Technology — *Sfax, Tunisia*
Engineering Cycle in Computer Engineering — 2023 – 2026

Preparatory Institute for Engineering Studies of Sfax — *Sfax, Tunisia*
Technology Preparatory Cycle — 2020 – 2023

Technical Skills

Programming Languages:
- Java, JavaScript, Python, C, PHP

Frameworks and Libraries:
- Spring Boot, React.js, .NET, Angular, Flutter, Laravel, PyTorch

Databases:
- MySQL, Oracle, PostgreSQL, SQL Server

Tools:
- Git, GitHub, GitLab, Docker, Kubernetes, LangChain, FAISS

Professional Experience

Final Year Internship: Sunevit — *Sfax, Tunisia*
Intelligent E-commerce Assistant for a Clothing Store — *February 2026 – June 2026*
- Design of an **AI-powered e-commerce** platform with product catalog, customer interface and administration dashboard.
- Implementation of the **business logic layer with Spring Boot**, including user management, product and stock management, order processing, REST APIs and secure backend services.
- Development of an intelligent **chatbot** using product data and user context to improve customer assistance.
- Integration of a **Corrective Retrieval-Augmented Generation (CRAG)** system with a **vector database** for accurate contextual answers.
- Implementation of a **recommendation system** to suggest products based on user preferences and catalog similarities.
- Technologies: **React.js, Spring Boot, Python, FastApi, LangChain, MySQL, Docker, Git.**

Advanced Internship: Acteol — *Sfax, Tunisia*
Web Development and Secure Service Integration — *June 2025 – September 2025*
- Integration of **OAuth2** authentication to enhance service security and access control.
- Development and consumption of **REST APIs** for survey retrieval and submission.
- Implementation of validations, conditional display, session tracking and error handling.
- Technologies: **.NET Core, React.js, JavaScript, OAuth2, SQL Server, REST APIs, Git.**

Introductory Internship: ExaDev — *Sfax, Tunisia*
Development of a Corporate Presentation Website — *June 2024 – August 2024*
- Design of a database and development of dynamic pages using **Blade**.
- Application of **Laravel** best practices: **MVC** architecture, routing and code organization.
- Technologies: **PHP, Laravel, MySQL, Blade, Git.**

Projects

Intelligent Image Captioning System — *AI Advanced Project*
- Development of an image analysis pipeline combining **photo/non-photo classification** and automatic image captioning.
- Integration of a **Vision-Language Model** with **RAG** rules to generate short, factual and context-aware image captions.
- Technologies: **Python, PyTorch, Transformers, BLIP, scikit-learn, FAISS, NumPy, Pandas.**

Certifications

- **365 Data Science** – Deep Learning with **PyTorch** – November 17, 2025.
- **365 Data Science** – Data Cleaning and Preprocessing with **pandas** – November 16, 2025.
- **IBM** – Advanced **RAG** with Vector Databases – August 27, 2025.
- **IBM** – Generative AI: Introduction and Applications – August 27, 2025.

Languages

Arabic **French** **English**
